

Euthanasia Rack Automating the Euthanasia Process and Monitoring CO₂ Levels

INSTALLATION

Installation requires CO₂ (dewar liquid CO₂ tanks, regulator with heater, and storage tank recommended) plumbed to rack area with 3/4" diameter pipe dropped from ceiling. Drop has ball valve and terminates in Snap-tite P/N: BVHC12-12F valved female coupler. A 15 amp twist-lock ceiling receptacle is recommended for the required 120 Volt AC, but this can be wall or floor mounted.

Blowers are mounted on wall brackets, and the transition controller and hose protector are fastened using wall anchors. The scavenger exhaust tube also mounts to the wall behind the exhaust blower. While a 9' ceiling height is preferred, an 8' min. can accommodate the 10 high rack and wall mounted blowers.

Euthanasia setup includes:

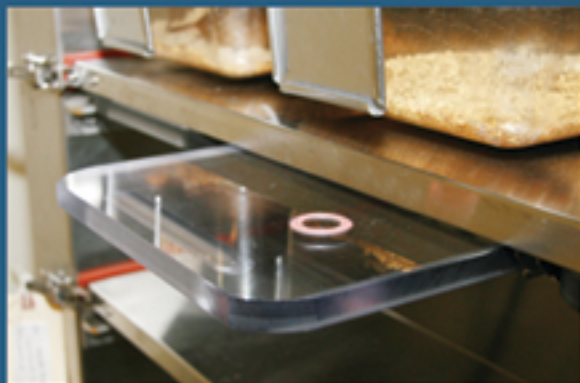

Rack, Euthanasia / Maintain Control Assembly (supply & exhaust blowers, blower wall brackets, scavenger exhaust tube, and CO₂ transition controller with CO₂ monitor), and transition.

Ordering information

EU-2-40-8-5 #2 cage, 8 high x 5 wide, 40 position Euthanasia Rack
EU-3-40-8-5 #3 cage, 8 high x 5 wide, 40 position Euthanasia Rack
EU-5-63-9-7 #5 cage, 9 high x 7 wide, 63 position Euthanasia Rack
EU-9-70-10-7 #1 and #9 cage, 10 high x 7 wide, 70 position Euthanasia Rack
EU-10-24-8-3 #10 cage, 8 high x 3 wide, 24 position Euthanasia Rack
EU-11-40-8-5 #11 cage, 8 high x 5 wide, 40 position Euthanasia Rack
EU-19-70-10-7 #19 cage, 10 high x 7 wide, 70 position Euthanasia Rack
Consult the factory for other size cages or adaptation to existing half racks.

Cages are not included.

Cage Location Plugs or empty cages are can be used for any open cage positions on the rack. Empty cages can also be used.

EU-2-PLUG #2, 3, 4, and 11 cage position plug
EU-5-PLUG #5 and 15 cage position plug
EU-9-PLUG #1 and 9 cage position plug
EU-19-PLUG #19 cage position plug
